

VIN CHIP PLUS

SUITABLE FOR ALL MODELS

For added identification VIN Chip Plus offers unique VIN marking for internal and removable items and is the only scheme that embeds the VIN number within the products that come in this pack.

Your VIN Chip Plus pack contains:

- 1 x RFID Chip
- 6 x VIN Chip Internal Tamper Evident Labels
- 1 x VIN Chip Door Warning label
- 1 x Microdot Pen
- 1 x Ultraviolet Security Pen
- 1 x Ultraviolet Torch
- 1 x microfibre cloth

Simply follow the fitting instructions below. When you have completed the installation of the electronic chip, please call **CRiS on 0203 282 1000** to inform them of the location, so it can be securely recorded against your caravan VIN.

FITTING INSTRUCTIONS

Please read carefully before commencing installation

Fitting the electronic RFID chip

When choosing a location for your chip, bear in mind that it must be capable of being read by a police scanner at a 6m distance when travelling up to 60mph, without interference from any metallic surfaces.

The front and rear cupboards and wardrobes are ideal locations for application.

Determine your location for the chip, ensuring that you have a large enough area.

Ensure the surface is clean and dry, remove the backing paper and firmly rub the chip onto the surface.

The police need to be able to read the chip from outside the caravan. It can be read through almost any other non-metallic surfaces and materials such as - wood, glass, glass fibre reinforced plastic etc.

Fitting the internal tamper evident labels

Your kit contains 6 tamper evident labels which can be placed in any position you choose. These are often best used on the inside of cupboard doors or the underside of drawers.

Make sure that the place you want to fit these is clean from grease and dirt. Peel off the backing and firmly press the label onto the intended surface. Once fitted the labels cannot be removed without damaging them.

Fitting the door warning label

Ensure that the window area that you have chosen to place the window label is dry and clean of grease or dirt, by wiping the area first with the microfibre cloth.

Carefully remove the backing of the label and firmly rub the label onto the window surface.

Fitting the micro VIN Chip dots, using the microdot pen

The microdots should be applied over as wide an area as possible to give maximum coverage.

Choose the area to apply the dots carefully, remembering they need to be accessible. Do not place on removable objects.

Use the microdot pen to transfer the dots to your chosen location.

It is fast, efficient and easy to apply. The dots will show as black specks on lighter surfaces.

Using the ultraviolet security pen

A simple and easy way to further enhance the identity of your caravan is by using the enclosed Ultraviolet Pen to write the last 8 digits of your caravan VIN onto the framework of the touring caravan. Ultraviolet ink on bare wood is extremely difficult to remove and invisible to the naked eye so choose some hidden area, such as the floor or framework under the seats. You can also use the ultraviolet pen to mark the rear of removable items, such as TVs, with your home postcode.

Using the ultraviolet torch

Once you have marked your caravan and any additional property using the Ultraviolet Security Pen you can use the Ultraviolet Torch to view the markings, as ultraviolet ink is invisible to the naked eye.

NOW YOU HAVE COMPLETED INSTALLATION NOTIFY CRiS!

Call CRiS 0203 282 1000 or email info@cris.co.uk to inform us where the electronic RFID chip has been fitted.

Your safety in fitting this kit is of paramount importance. Fitting your VIN Chip Plus Kit is a non-hazardous process provided you follow the instructions carefully. If you are in any doubt, seek professional assistance.

The electronic RFID chip is fairly fragile and should be treated with care.

The microdots provided are not toxic, but are extremely small and light. Avoid close contact to prevent inhalation and keep clear of eyes. The dot adhesive is water based non-volatile, non-flammable liquid. It is low in toxicity but care should be taken not to ingest the liquid. If accidentally drunk take plenty of liquid, preferably milk and DO NOT induce vomiting. In case of accidental contact with eyes wash liberally with clean water. Contact with skin should be avoided (some sensitive skin types may be irritated) and if contact occurs wash with soap and water.
